REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: the claimed apparatus including a flexible inflatable body in fan communication with a load-bearing structure having the feature of a the load bearing structure being movably disposed to assume an extended position in which the load-bearing structure is extended out of a bottom part when the apparatus in operation and a retracted position in which the load-bearing structure is retracted into the bottom part when the apparatus not in operation is not considered to be taught in the prior art either singly or in combination. The closest prior art reference is considered Cares (US 5,148,955) which is considered to teach the patentably distinguishing features. Other prior art references contain individually recited claimed features, but are considered to contain the motivation to combine those references for an obviousness rejection. Those other prior art references have been cited in this action. The considered patentably distinct feature is found in the sole independent claim.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
